TECHNICAL SKILLS

Frontend: React 19, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
Backend & API: Next.js API Routes, REST APIs, PHP (Laravel), Firebase Admin SDK, Java (Spring Boot)
Database & Cloud: Firebase (Firestore, Authentication), Supabase, MySQL
AI & Productivity: ChatGPT/Codex, Claude AI, GitHub Copilot, Gemini AI
Tools: Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

Software Engineer | Vision2Creation *Jan 2026 – October 2026*

- Developed and maintained AI-powered SaaS platforms using React, Next.js, TypeScript, Firebase, and Firestore.
- Designed and implemented full-stackfeatures including reporting systems, communication tools, notification services, workflow automation, and real-time data synchronization.
- Built scalable cloud-based applications with secure role-based access control, responsive interfaces, and optimized user experiences.
- Engineered complex data models, business workflows, and platform integrations to support operational efficiency and user engagement.
- Collaborated with cross-functional teams on architecture planning, database migrations, testing, bug resolution, and production deployments.

PHP Developer – Technology Developer | ClaaS2SaaS Pte. Ltd. (Singapore) *Nov 2024 – Dec 2025*

- Developed and maintained internal and client-facing web applications using PHP (Laravel), JavaScript, HTML, CSS, and MySQL, covering front-end and back-end functionality.
- Participated in testing, debugging, deployment, and collaborative workflows using Git and GitHub.
- Contributed to a Conversational Marketing AI application, an AI-powered marketing platform built with Laravel and API integrations, within an industry-accredited software engineering program.

PERSONAL PROJECTS

AutoCare+ (Vehicle Maintenance Tracking App) | Next.js 14, React, TypeScript, Tailwind CSS, Supabase *2026*

- Built a full-stack app for managing vehicles, maintenance history, service reminders, and profiles, with vehicle CRUD and maintenance logging.
- Implemented Supabase authentication (email/password and Google OAuth), protected routes, and row-level security for owner-based data access.
- Developed automatic reminder generation via a rule-based maintenance recommendation engine, and a responsive dark dashboard UI with Framer Motion animations.

LunarLedger (Personal Budget Management App) | React 19, Vite, Tailwind CSS, Chart.js, FullCalendar *2026*

- Developed a budgeting app for weekly salary management, payable tracking, and spending analysis, with separate planner and insights workflows.
- Implemented interactive visualizations with Chart.js, calendar-based planning with FullCalendar, and custom safe-to-spend, cumulative expense, and forecasting utilities.

Personal Portfolio Website | Next.js, React, TypeScript, Three.js, Tailwind CSS *2026*

- Designed and built an immersive portfolio with interactive components, animations, and custom 3D visualizations using Three.js.
- Implemented responsive layouts and reusable component architecture with a focus on performance.

EDUCATION

BS in Information Technology, Major in Software Engineering *Expected 2027*
University of Cebu (Philippines) & EduCLaaS Lithan (Singapore)

CERTIFICATIONS & ACHIEVEMENTS

Applied Degree in Software Engineering (In Progress) · EduCLaaS / Lithan Software Engineering Program
